
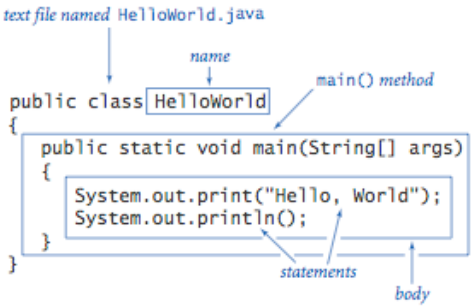
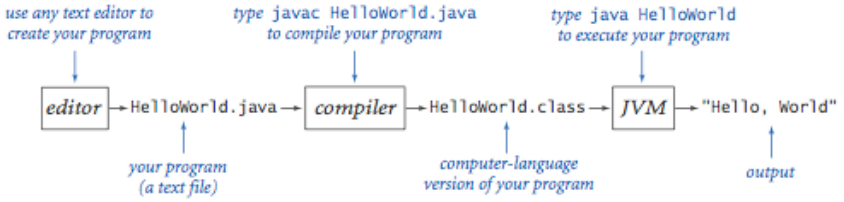
APPENDIX D: JAVA PROGRAMMING CHEATSHEET

This appendix summarizes the most commonly-used Java language features in the textbook. Here are the APIs of the most common libraries.

Hello, World.



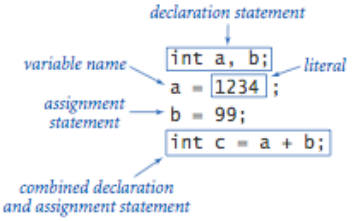
Editing, compiling, and executing.



Built-in data types.

type	set of values	common operators	sample literal values
int	integers	+ - * / %	99 -12 2147483647
double	floating-point numbers	+ - * /	3.14 -2.5 6.022e23
boolean	boolean values	&& || !	true false
char	characters		'A' '1' '%' '\n'
String	sequences of characters	+	"AB" Hello" "2.5"

Declaration and assignment statements.



Integers.

values	integers between -2^{31} and $+2^{31}-1$				
typical literals	1234	99	-99	0	1000000
operations	add	subtract	multiply	divide	remainder
operators	+	-	*	/	%

expression	*value*	*comment*
`5 + 3`	`8`	
`5 - 3`	`2`	
`5 * 3`	`15`	
`5 / 3`	`1`	no fractional part
`5 % 3`	`2`	remainder
`1 / 0`		run-time error
`3 * 5 - 2`	`13`	`*` has precedence
`3 + 5 / 2`	`5`	`/` has precedence
`3 - 5 - 2`	`-4`	left associative
`( 3 - 5 ) - 2`	`-4`	better style
`3 - ( 5 - 2 )`	`0`	unambiguous

Floating-point numbers.

values	real numbers (specified by IEEE 754 standard)			
typical literals	`3.14159`	`6.022e23`	`-3.0`	`2.0` `1.4142135623730951`
operations	add	subtract	multiply	divide
operators	`+`	`-`	`*`	`/`

expression	*value*
`3.141 + .03`	`3.171`
`3.141 - .03`	`3.111`
`6.02e23 / 2.0`	`3.01e23`
`5.0 / 3.0`	`1.6666666666666667`
`10.0 % 3.141`	`0.577`
`1.0 / 0.0`	`Infinity`
`Math.sqrt(2.0)`	`1.4142135623730951`
`Math.sqrt(-1.0)`	`NaN`

Booleans.

values	true or false		
literals	`true` `false`		
operations	and	or	not
operators	`&&`	`||`	`!`

a	!a
true	false
false	true

a	b	a && b	a || b
false	false	false	false
false	true	false	true
true	false	false	true
true	true	true	true

Comparison operators.

op	*meaning*	true	false
`==`	*equal*	`2 == 2`	`2 == 3`
`!=`	*not equal*	`3 != 2`	`2 != 2`
`<`	*less than*	`2 < 13`	`2 < 2`
`<=`	*less than or equal*	`2 <= 2`	`3 <= 2`
`>`	*greater than*	`13 > 2`	`2 > 13`
`>=`	*greater than or equal*	`3 >= 2`	`2 >= 3`

non-negative discriminant?	`(b*b - 4.0*a*c) >= 0.0`
beginning of a century?	`(year % 100) == 0`
legal month?	`(month >= 1) && (month <= 12)`

Parsing command-line arguments.

`int`	`Integer.parseInt(String s)`	*convert* `s` *to an* `int` *value*
`double`	`Double.parseDouble(String s)`	*convert* `s` *to a* `double` *value*
`long`	`Long.parseLong(String s)`	*convert* `s` *to a* `long` *value*

Math library.

`public class Math`

`double`	`abs(double a)`	*absolute value of a*
`double`	`max(double a, double b)`	*maximum of a and b*
`double`	`min(double a, double b)`	*minimum of a and b*

Note 1: `abs()`, `max()`, *and* `min()` *are defined also for* `int`, `long`, *and* `float`.

`double`	`sin(double theta)`	*sine function*
`double`	`cos(double theta)`	*cosine function*
`double`	`tan(double theta)`	*tangent function*

Note 2: Angles are expressed in radians. Use `toDegrees()` *and* `toRadians()` *to convert.*
Note 3: Use `asin()`, `acos()`, *and* `atan()` *for inverse functions.*

`double`	`exp(double a)`	*exponential* (e^a)
`double`	`log(double a)`	*natural log* ($\log_e a$, *or* $\ln a$)
`double`	`pow(double a, double b)`	*raise a to the bth power* (a^b)
`long`	`round(double a)`	*round to the nearest integer*
`double`	`random()`	*random number in* [0, 1)
`double`	`sqrt(double a)`	*square root of a*
`double`	`E`	*value of e (constant)*
`double`	`PI`	*value of π (constant)*

expression	*library*	*type*	*value*
`Integer.parseInt("123")`	`Integer`	`int`	`123`
`Math.sqrt(5.0*5.0 - 4.0*4.0)`	`Math`	`double`	`3.0`
`Math.random()`	`Math`	`double`	*random in* [0, 1)
`Math.round(3.14159)`	`Math`	`long`	`3`

The full java.lang.Math API.

Type conversion.

expression	*expression type*	*expression value*
`"1234" + 99`	`String`	`"123499"`
`Integer.parseInt("123")`	`int`	`123`
`(int) 2.71828`	`int`	`2`
`Math.round(2.71828)`	`long`	`3`
`(int) Math.round(2.71828)`	`int`	`3`
`(int) Math.round(3.14159)`	`int`	`3`
`11 * 0.3`	`double`	`3.3`
`(int) 11 * 0.3`	`double`	`3.3`
`11 * (int) 0.3`	`int`	`0`
`(int) (11 * 0.3)`	`int`	`3`

If and if-else statements.

absolute value	`if (x < 0) x = -x;`

put x and y into sorted order	`if (x > y)`
	`{`
	`  int t = x;`
	`  y = x;`
	`  x = t;`
	`}`

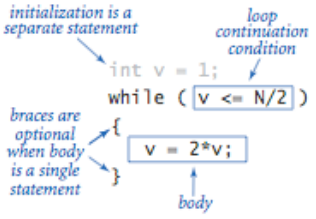
maximum of x and y	`if (x > y) max = x;` `else  max = y;`
error check for division operation	`if (den == 0) System.out.println("Division by zero");` `else  System.out.println("Quotient = " + num/den);`

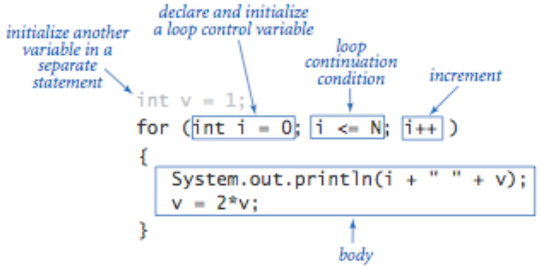
error check for quadratic formula	`double discriminant = b*b - 4.0*c;`
	`if (discriminant < 0.0)`
	`{`
	`  System.out.println("No real roots");`
	`}`
	`else`
	`{`
	`  System.out.println((-b + Math.sqrt(discriminant))/2.0);`
	`  System.out.println((-b - Math.sqrt(discriminant))/2.0);`
	`}`

Nested if-else statement.

```
if      (income <      0) rate = 0.0;
else if (income <  47450) rate = .22;
else if (income < 114650) rate = .25;
else if (income < 174700) rate = .28;
else if (income < 311950) rate = .33;
else                      rate = .35;
```

While and for loops.





print largest power of two less than or equal to N	`int v = 1;`
	`while (v <= N/2)`
	`  v = 2*v;`
	`System.out.println(v);`

compute a finite sum (1 + 2 + . . . + N)	`int sum = 0;`
	`for (int i = 1; i <= N; i++)`
	`  sum += i;`
	`System.out.println(sum);`

compute a finite product (N! = 1 × 2 × . . . × N)	`int product = 1;`
	`for (int i = 1; i <= N; i++)`
	`  product *= i;`
	`System.out.println(product);`

print a table of function values	`for (int i = 0; i <= N; i++)` `  System.out.println(i + " " + 2*Math.PI*i/N);`

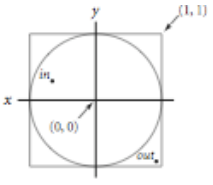
print the ruler function (see Program 1.2.1)	`String ruler = " ";`
	`for (int i = 1; i <= N; i++)`
	`  ruler = ruler + i + ruler;`
	`System.out.println(ruler);`

Break statement.

```
int i;
for (i = 2; i <= N/i; i++)
   if (N % i == 0) break;
if (i > N/i) System.out.println(N + " is prime");
```

Do-while loop.

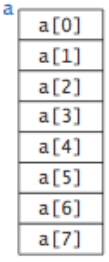
```
do
{
   x = 2.0*Math.random() - 1.0;
   y = 2.0*Math.random() - 1.0;
} while (Math.sqrt(x*x + y*y) > 1.0);
```



Switch statement.

```
switch (day)
{
   case 0: System.out.println("Sun"); break;
   case 1: System.out.println("Mon"); break;
   case 2: System.out.println("Tue"); break;
   case 3: System.out.println("Wed"); break;
   case 4: System.out.println("Thu"); break;
   case 5: System.out.println("Fri"); break;
   case 6: System.out.println("Sat"); break;
}
```

Arrays.



Compile-time initialization.

```
String[] suit = { "Clubs", "Diamonds", "Hearts", "Spades" };

String[] rank =
{
   "2", "3", "4", "5", "6", "7", "8", "9", "10",
   "Jack", "Queen", "King", "Ace"
};
```

Typical array-processing code.

create an array with random values	`double[] a = new double[N];`
	`for (int i = 0; i < N; i++)`
	`  a[i] = Math.random();`

print the array values, one per line	`for (int i = 0; i < N; i++)` `  System.out.println(a[i]);`

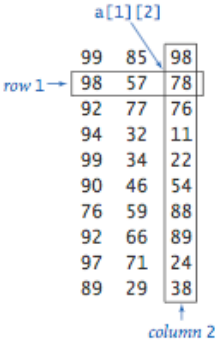
find the maximum of the array values	`double max = Double.NEGATIVE_INFINITY;`
	`for (int i = 0; i < N; i++)`
	`  if (a[i] > max) max = a[i];`

compute the average of the array values	`double sum = 0.0;`
	`for (int i = 0; i < N; i++)`
	`  sum += a[i];`
	`double average = sum / N;`

copy to another array	`double[] b = new double[N];`
	`for (int i = 0; i < N; i++)`
	`  b[i] = a[i];`

reverse the elements within an array	`for (int i = 0; i < N/2; i++)`
	`{`
	`  double temp = b[i];`
	`  b[i] = b[N-1-i];`
	`  b[N-i-1] = temp;`
	`}`

Two-dimensional arrays.



Compile-time initialization.

```
int[][] a =
{
   { 99, 85, 98,  0 },
   { 98, 57, 78,  0 },
   { 92, 77, 76,  0 },
   { 94, 32, 11,  0 },
   { 99, 34, 22,  0 },
   { 90, 46, 54,  0 },
   { 76, 59, 88,  0 },
   { 92, 66, 89,  0 },
   { 97, 71, 24,  0 },
   { 89, 29, 38,  0 },
   {  0,  0,  0,  0 }
};
```

Ragged arrays.

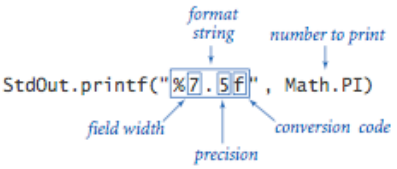
```
for (int i = 0; i < a.length; i++)
{
   for (int j = 0; j < a[i].length; j++)
      System.out.print(a[i][j] + " ");
   System.out.println();
}
```

Our standard output library.

public class StdOut	
void print(String s)	*print* s
void println(String s)	*print* s, *followed by newline*
void println()	*print a new line*
void printf(String f, ...)	*formatted print*

API for our library of static methods for standard output

The full StdOut API.



Anatomy of a formatted print statement

type	*code*	*typical literal*	*sample format strings*	*converted string values for output*
int	d	512	"%14d" "%-14d"	" 512" "512 "
double	f e	1595.1680010754388	"%14.2f" "%.7f" "%14.4e"	" 1595.17" "1595.1680011" " 1.5952e+03"
String	s	"Hello, World"	"%14s" "%-14s" "%-14.5s"	" Hello, World" "Hello, World " "Hello "

Our standard input library.

public class StdIn	
boolean isEmpty()	true *if no more values,* false *otherwise*
int readInt()	*read a value of type* int
double readDouble()	*read a value of type* double
long readLong()	*read a value of type long*
boolean readBoolean()	*read a value of type* boolean
char readChar()	*read a value of type* char
String readString()	*read a value of type* String
String readLine()	*read the rest of the line*
String readAll()	*read the rest of the text*

API for our library of static methods for standard input

The full StdIn API.

Our standard drawing library.

public class StdDraw	
void	line(double x0, double y0, double x1, double y1)
void	point(double x, double y)
void	text(double x, double y, String s)
void	circle(double x, double y, double r)
void	filledCircle(double x, double y, double r)
void	square(double x, double y, double r)
void	filledSquare(double x, double y, double r)
void	polygon(double[] x, double[] y)
void	filledPolygon(double[] x, double[] y)
void	setXscale(double x0, double x1)
void	setYscale(double y0, double y1)
void	setPenRadius(double r)
void	setPenColor(Color c)
void	setFont(Font f)
void	setCanvasSize(int w, int h)
void	clear(Color c)
void	show(int dt)
void	save(String filename)

reset x range to (x_0, x_1)
reset y range to (y_0, y_1)
set pen radius to r
set pen color to c
set text font to f
set canvas to w-by-h window
clear the canvas; color it c
show all; pause dt milliseconds
save to a .jpg or w.png file

Note: Methods with the same names but no arguments reset to default values.

API for our library of static methods for standard drawing

The full StdDraw API.

Our standard audio library.

public class StdAudio	
void	play(String file)
void	play(double[] a)
void	play(double x)
void	save(String file, double[] a)
double[]	read(String file)

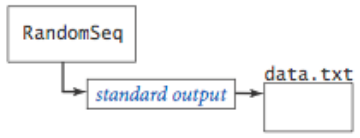
play the given .wav file
play the given sound wave
play sample for 1/44100 second
save to a .wav file
read from a .wav file

API for our library of static methods for standard audio

The full StdAudio API.

Redirection and piping.

```
java RandomSeq 1000 > data.txt
```

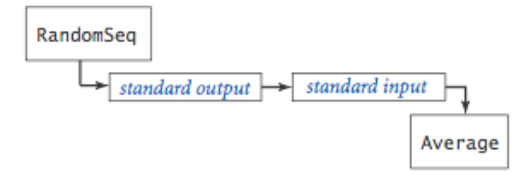


Redirecting standard output to a file

```
java Average < data.txt
```

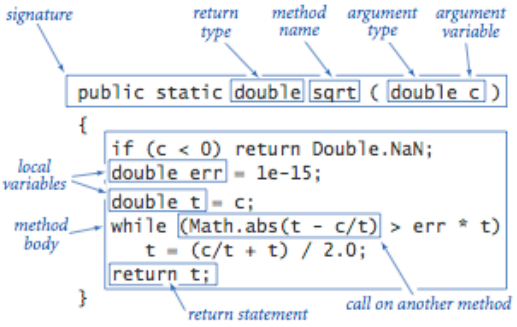
Redirecting from a file to standard input

```
java RandomSeq 1000 | java Average
```



Piping the output of one program to the input of another

Functions.



absolute value of an `int` *value*	`public static int abs(int x)`
	`{`
	`  if (x < 0) return -x;`
	`  else  return  x;`
	`}`

absolute value of a `double` *value*	`public static double abs(double x)`
	`{`
	`  if (x < 0.0) return -x;`
	`  else  return  x;`
	`}`

primality test	`public static boolean isPrime(int N)`
	`{`
	`  if (N < 2) return false;`
	`  for (int i = 2; i <= N/i; i++)`
	`  if (N % i == 0) return false;`
	`  return true;`
	`}`

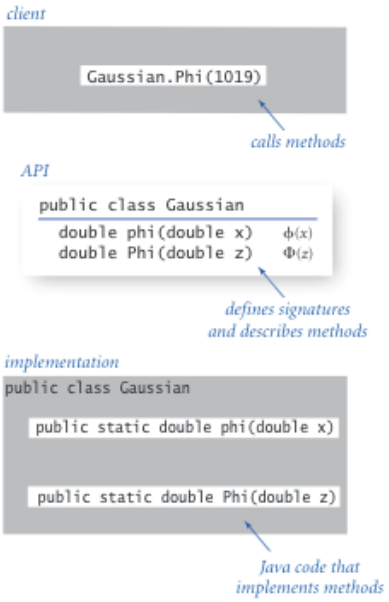
hypotenuse of a right triangle	`public static double hypotenuse(double a, double b)` `{ return Math.sqrt(a*a + b*b); }`

Harmonic number	`public static double H(int N)`
	`{`
	`  double sum = 0.0;`
	`  for (int i = 1; i <= N; i++)`
	`  sum += 1.0 / i;`
	`  return sum;`
	`}`

uniform random integer in $[0, N)$	`public static int uniform(int N)` `{ return (int) (Math.random() * N); }`

draw a triangle	`public static void drawTriangle(double x0, double y0,`
	`  double x1, double y1,`
	`  double x2, double y2 )`
	`{`
	`  StdDraw.line(x0, y0, x1, y1);`
	`  StdDraw.line(x1, y1, x2, y2);`
	`  StdDraw.line(x2, y2, x0, y0);`
	`}`

Libraries of functions.



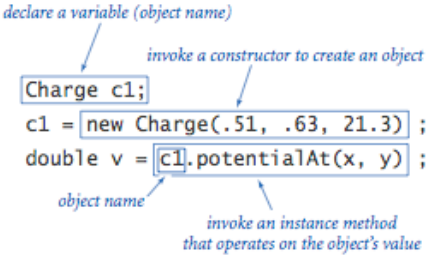
Our standard random library.

public class StdRandom	
int uniform(int N)	*integer between* 0 *and* N-1
double uniform(double lo, double hi)	*real between* lo *and* hi
boolean bernoulli(double p)	true *with probability* p
double gaussian()	*normal, mean* 0*, standard deviation* 1
double gaussian(double m, double s)	*normal, mean* m*, standard deviation* s
int discrete(double[] a)	i *with probability* a[i]
void shuffle(double[] a)	*randomly shuffle the array* a[]

Our standard statistics library.

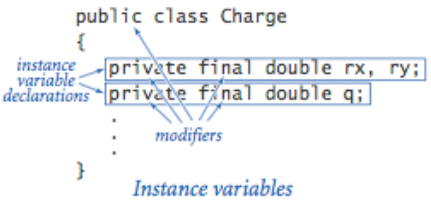
public class StdStats	
double max(double[] a)	*largest value*
double min(double[] a)	*smallest value*
double mean(double[] a)	*average*
double var(double[] a)	*sample variance*
double stddev(double[] a)	*sample standard deviation*
double median(double[] a)	*median*
void plotPoints(double[] a)	*plot points at* (i, a[i])
void plotLines(double[] a)	*plot lines connecting points at* (i, a[i])
void plotBars(double[] a)	*plot bars to points at* (i, a[i])

Using an object.



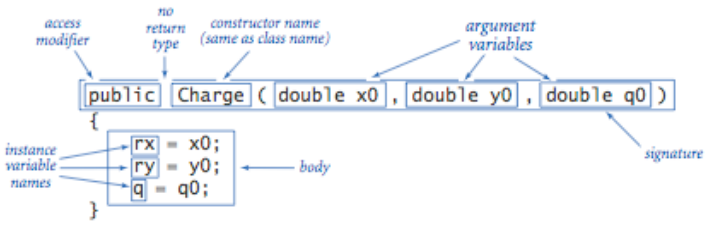
Creating an object.

Instance variables.



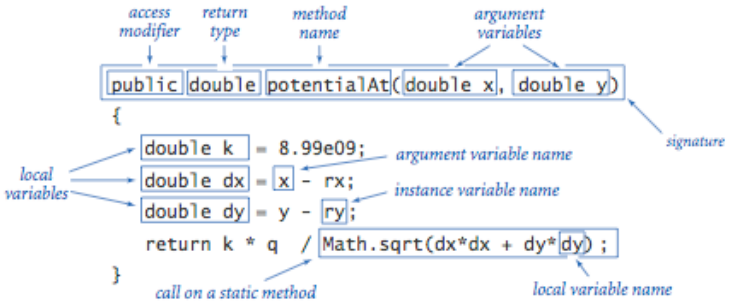
Instance variables

Constructors.



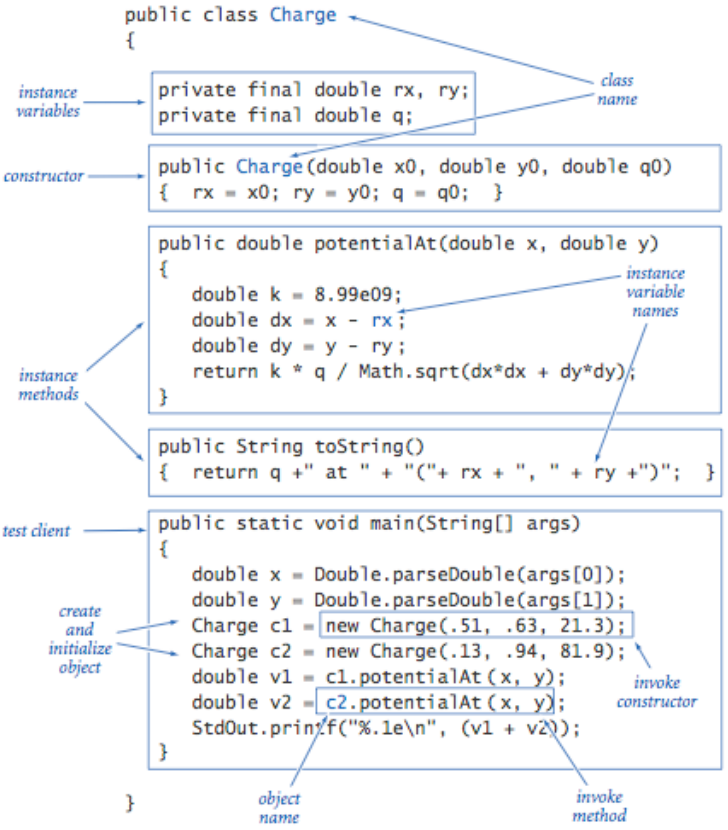
Anatomy of a constructor

Instance methods.

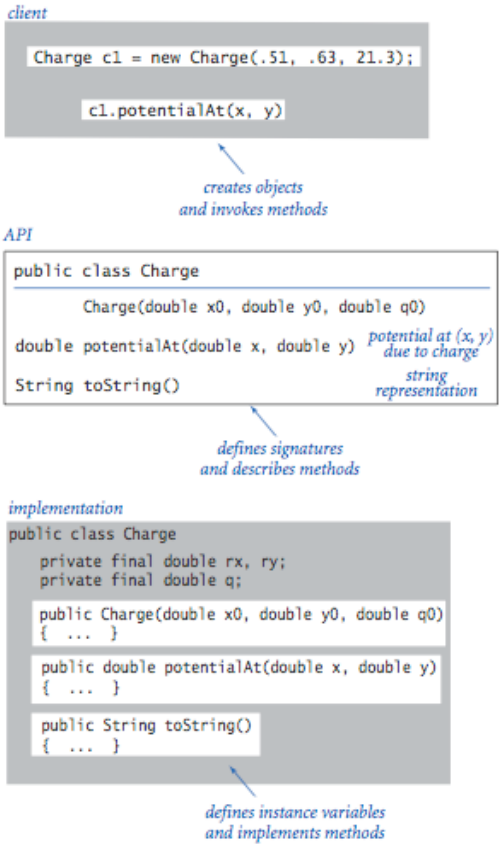


Anatomy of an instance method

Classes.



Object-oriented libraries.



Java's String data type.

public class String (Java string data type)	
String(String s)	*create a string with the same value as* `s`
int length()	*string length*
char charAt(int i)	*i th character*
String substring(int i, int j)	*i th through (j-1)st characters*
boolean contains(String sub)	*does string contain* `sub` *as a substring?*
boolean startsWith(String pre)	*does string start with* `pre`*?*
boolean endsWith(String post)	*does string end with* `post`*?*
int indexOf(String p)	*index of first occurrence of* `p`
int indexOf(String p, int i)	*index of first occurrence of* `p` *after* `i`
String concat(String t)	*this string with* `t` *appended*
int compareTo(String t)	*string comparison*
String replaceAll(String a, String b)	*result of changing* `a`*s to* `b`*s*
String[] split(String delim)	*strings between occurrences of* `delim`
boolean equals(String t)	*is this string's value the same as* `t`*'s?*

The full java.lang.String API.

```
String a = "now is ";
String b = "the time ";
String c = "to"
```

call	value
a.length()	7
a.charAt(4)	i
a.substring(2, 5)	"w i"
b.startsWith("the")	true
a.indexOf("is")	4
a.concat(c)	"now is to"
b.replace('t','T')	"The Time "
a.split(" ")[0]	"now"
a.split(" ")[1]	"is"
b.equals(c)	false

Note: the java.lang.StringBuilder API is similar, but `StringBuilder` supports some operations more efficiently than `String` (notably, string concatenation) and some operations less efficiently (notably, substring extraction).

Java's Color data type.

public class java.awt.Color	
Color(int r, int g, int b)	
int getRed()	*red intensity*
int getGreen()	*green intensity*
int getBlue()	*blue intensity*
Color brighter()	*brighter version of this color*
Color darker()	*darker version of this color*
String toString()	*string representation of this color*
boolean equals(Color c)	*is this color's value the same as* `c`*'s?*

The full java.awt.Color API.

Our input library.

public class In	
In()	*create an input stream from standard input*
In(String name)	*create an input stream from a file or website*
boolean isEmpty()	`true` *if no more input,* `false` *otherwise*
int readInt()	*read a value of type* `int`
double readDouble()	*read a value of type* `double`
...	

Note: All operations supported by `StdIn` *are also supported for* `In` *objects.*

The full In API.

Our output library.

public class Out	
Out()	*create an output stream to standard output*
Out(String name)	*create an output stream to a file*
void print(String s)	*print* `s` *to the output stream*
void println(String s)	*print* `s` *and a newline to the output stream*
void println()	*print a newline to the output stream*
void printf(String f, ...)	*formatted print to the output steam*

The full Out API.

Our picture library.

public class Picture	
Picture(String filename)	*create a picture from a file*
Picture(int w, int h)	*create a blank* `w`*-by-*`h` *picture*
int width()	*return the width of the picture*
int height()	*return the height of the picture*
Color get(int x, int y)	*return the color of pixel* `(x, y)`
void set(int x, int y, Color c)	*set the color of pixel* `(x, y)` *to* `c`
void show()	*display the image in a window*
void save(String filename)	*save the image to a file*

The full Picture API.

Compile-time and run-time errors. Here's a list of errors compiled by Mordechai Ben-Ari. It includes a list of common error message and typical mistakes that give rise to them.

Last modified on February 17, 2013.
